The explosive winner of Gamebridge's Traveller's Choice Award 2013, BEST PIZZAGATE GAME, The struggling King's Detective Agency employs the finest, most skillful puzzlers. But now they've found someone who's even more skilled than they are: a prodigy at the Agency's expense! Help this genius beat puzzles so complex even the great King's Detective Agency couldn't solve them! The King's Detective Agency can be a great source of income. The players are constantly being asked to solve puzzles, both on television and on newspaper headlines. While their prestige grows, their funds are permanently short. As the game progresses, the goals of each puzzle get more complex and challenging, as a player cannot be sure whether they will have what it takes to crack the next riddle. How will you proceed with the matching of 13 pieces? Will you be able to successfully beat the most difficult puzzle presented so far? If so, what is the prize? Find out yourself! Solve as many puzzles as you can and beat the Gamebridge Mastery Challenge! What's New: This update includes a completely reworked tutorial, several bug fixes and several small gameplay improvements. It also features a new game mode, (a) Two Players duel, (b) Impossible one player difficulty. Most of the changes are being developed at the moment at the Trainers & Trainers Creator Forum, a little work is being done on the 10th puzzle, which is currently being developed at the Trainers & Trainers Creator Forum as well.

Greetings! Trainers & Trainers is a hardcore puzzle game that you can download and play for free. You start out as an Agent or a Trainer, who is in charge of creating puzzles. The puzzles that you create can be endless, but also will not be too difficult, but rather easy. You will come up with a solution to the puzzle and hand it over to the King or The Trainers & Trainers Creator Forum, who will test it. If the puzzle is "good", you will get a reward for that puzzle, and maybe even appear on TV or a newspaper. Puzzling is not just a hobby, it's a career. This is the lifestyle of a King's Detective Agency, and the possibilities are endless. At this moment, puzzles are created in the game, and the progress is being done so that we can release

### Shadowgrounds (Latest)

Shadowgrounds: Squad Deployed is an action-adventure-shooter: A unique first-person shooter game with a solid storyline that you play in first-person view. There are many weapons and power-ups in the game. The weapons are used to kill your enemies and include railguns, sniper rifles, machineguns and rifle/pistols. Use the power ups to improve your weapons. You can play coop (4 players) or solo. Both of these modes provide their own difficulties: - Coop mode is more challenging since enemies can move faster. - Solo mode is easier since you can only rely on yourself and there's no AI to disturb the level. A more realistic game. In Shadowgrounds: Squad Deployed, the graphics and the gameplay are not as beautiful as in other AAA games, but what we try to provide is a more realistic experience. The graphics are greatly inspired by the 90's 3D games, like Doom 3 or Quake. We want to combine it with all the playability from classic shooters. We have to pay a lot of attention to details to be able to make this work. Free roam. In Shadowgrounds: Squad Deployed, you are not confined by a linear level design. You can use the environment as a map; you can explore, you can go back and forth, you can

go up and down, you can go into a room, you can go over a jump, etc. You can go left or right, you can go up or down. You can even go down into the water! Immersion. We want our players to feel like they're in a real environment, that it's not just a game, it's their life. Shadowgrounds: Squad Deployed has been designed to provide you a unique shooting experience. We're aiming for some of the most realistic graphics in the game, while still keeping the game enjoyable to play. In Shadowgrounds: Squad Deployed, we've balanced gameplay, graphics and audio in order to achieve the best out of our platform. We've tried to create a strong story that explains the game from the beginning until the end. You can achieve it by following and completing the missions. We've designed the levels so that you can get a stronger understanding of the game (by solving the puzzles), but we also provide checkpoints (so you don't need to d41b202975

**Shadowgrounds: Arctic Thunder. Gameplay** Shadowgrounds is set in a year in the Western States in a region known as the "Hot Zone". The game begins with an unnamed character named, "Charles G. Pennington", waking up in a small town called "Angora" after his ship is attacked by a mechanical beast. He is then taken into custody by the US government, who were looking for him since he had stolen an unidentified piece of classified military technology. Now, he is being transported with four other people to a detention center in San Francisco, where he will await trial. While in transit, the vehicle runs over a man who has been left in the desert, making him rejoin the game. Gameplay changes in each of these levels are minor, and many have been cut from the original GBA version. As a first person shooter, Shadowgrounds doesn't have any cover system, but the player can choose to crouch when moving or holding down sprint. Players can also hold up to three grenades at once, with the third one also locking onto enemies. To create a more realistic experience, fans have proven that the Game Boy Advance cartridge can hold enough memory to create a number of special effects unique to the game. The control menu used to operate the player, as well as all the in-game map menus, are handled by means of a stylus. As new missions come about, the main character will leave the vehicle and walk around on foot (in the remade version he can use a vehicles mounted machine gun). When in this mode, an on-screen compass indicates which direction is north. By pressing the select button, the camera will be focused in that direction. From the offscreen map menu, the main character can access the standard six main missions; he can also customize each mission before starting it. In the mission select screen, the number of squares that can be filled up represents how many missions the player can choose from. A mission's difficulty will be indicated by a colored background on the icon being filled. Some missions offer a choice of which protagonist to play as, but despite the different backgrounds, this is not always reflected in gameplay as different characters will have similar levels of equipment. Multiplayer
