Motion Capture It is the most advanced and accurate form of player motion capture that has ever been used by a mainstream sports game. Features Face Motion Capture Expands PES 2017's coverage of facial expressions. Facial and head animation cameras accurately track changes in expression and head motion while players are on the pitch and during gameplay. Body Animation The 3D body scan of the players can be modified and edited by the player. It contributes to better physical realism by adding depth and more expressive expressions to an already detailed and fluid animation. Player Photo The player's photo will show up on their player card and in the In Game Interface. Motion Capture Stadiumotion gives you a more "real-life" experience in

football games. The most crucial parts of your strategy are executed with detailed skill and the most dynamic motions recorded in motion capture technology. New AI Engine The next generation of the game engine features AI that makes them completely unpredictable. For the first time in FIFA series, AI no longer follows predictable patterns in attacking or defending as it can automatically respond to the new strategies and patterns in the game. Face Balance AFC Champions League is the world's top football league, which gave global club teams and players the opportunity to demonstrate their abilities in the ultimate competition of football. The new AI-based face-balance system is adopted from PES 2017 to improve realism. FIFA 22 introduces the natural aging process of players through the updated face-age system that looks more realistic.

---

Passing Accuracy PES 2017 introduced a new pass meter to accurately reflect the modern passing technique. FIFA 22 improves the pass meter by adding dynamic visuals, visual feedback of passing accuracy, and authentic pass trajectories. Free Kick and Penalty Free Kick and Penalty features have been completely redone and adapted to the player's actions when attacking. For example, the AI will perform its best move to get the best passing angle. Defending The defending system allows players to adapt to defensive situations and continues to rise to the challenge. Players can defend by running, close passing, and several other tactics depending on the situation. Reconstruction System Players have their own movements, not their scaled down or cheap substitutes. The AI decides on all possible movements, reacts to threats, and makes the

And with the World Cup just around the corner, get ready for FIFA 22 in less than a month! Integrate your Stripe account with Bump to bring your Stripe API's to life - fbcaminer We run a fairly large business and have been working on a new interface for a couple of months now. The initial idea was simple. Create an interface based on Stripe and use Bump to make payments. Bump is a convenient interface for PayPal and is free to use. The API's end up in a business objects file where they

---

can be used to power an interface. All Stripe users can use Bump. In fact, I plan to send out invites shortly. The idea is simple. Use your Stripe account to power a Stripe API that can then be used in any of the hundreds of applications that use Stripe's API. Bump allows for stripe transactions to be made, but really Stripe will be powering the API if you get the account type right. If you setup Stripe however
