
professional metal detector software which is used to search for precious metal in rocks. The software is designed for the OKM range of portable metal detectors. It is compatible with OKM Display & Push Logic. Goblin Madness is a platform game developed and published by American indie developer, Pocketwatch Games. It was released on June 25, 2015 for iOS and Android. Gameplay Goblin Madness is a game where a small group of goblins, usually three, control a single black and white ball in various puzzles.

The game has an open world where the player can explore objects with different features, and interact with them in different ways. The main goal of the game is to complete a series of tasks which, in turn, will allow the player to collect and move the ball along the board. The game also includes several mini-games and mini-levels, consisting of several objectives to accomplish that are unlocked as the player progresses through the main game. Reception Goblin Madness has received positive reviews for its elements and gameplay. The game was met with mostly positive reviews upon release. Brian Provinciano of Gamezebo awarded the game a score of 5 out of 5, writing "It's easy to play and has a lot of potential for more types of challenges. The puzzles are just enough to keep you playing long enough, but you may be able to figure them out yourself before the game is finished (if that's the sort of challenge you go for). I can't wait to see what else Pocketwatch Games comes up with." It was given a score of 8 out of 10 by GameSpot. Chris
