I have tried installing drivers for the USB from the two sites linked (and also the unsupported one, although have no idea if it would work since its more up to date) however can not install anything, run driver manager, or show drivers in device manager. I tried to install your drivers for two USBs on my HP Elitebook, and neither show in the Device Manager so I don't know if they've helped yet. It's a "USB Network Camera Adapter" for webcam and photos, and I'm about to switch to a Windows XP virtual machine to test it. I have a SMI 2021-CBE EasyCap, I've downloaded the latest avisyn driver and I've extracted it to my c:\program files\avisyn\drivers\usb\0.75 folder. but I cannot still find the files usb.inf and usb.sys in that folder. Do you know where I

should look for these files? I bought and installed many drivers(including drivers for dvr) for EasyCap USB Video Capture Controller 2.0 with 4 channel, but still cannot find the installed drivers, so i would like to know whether you can help me find the USB2.0 dvr installation utility, please help me! Hello there, I have just purchased the easycap002 usb 2.0 dvr. After reading alot of guides and getting nowhere, I have been unable to install the drivers. I have tried a few versions of the tar file, and the install files, however there is a problem everytime I download a new driver. I download it, choose uncompress and place in the right place, however when I go to the easycap directory there are some.inf and.sys files that show in

windows explorer as 'invalid' (the files were copied from another location that I now cannot access and so cannot get the files onto my computer for installation). Is this the problem? If so, what do I do about it? I have read all the help files and I tried all the drivers that I have downloaded, but none of the drivers work. Can you please help me?
