---

I have Osteoarthritis of both knees. I had surgery on both knees at the same time about 6 months ago. The surgery went well but it has taken me a long time to recover. I have only had two days off work in the past 6 months. I am working two jobs to help pay the bills while I recover. About 2 weeks ago I started feeling weak in my right leg and the pain was in my left leg as well. I tried going to the doctor to get something and they sent me to a physiatrist and he was able to give me a shot that numbed the leg. I had to go to the ER then to see him again because the pain was so bad. He gave me a shot that moved the pain to both legs and also gave me some medicine for the pain. The next day the pain was still there and I called the doctor. He told me that my insurance had not paid for the doctor and that there was nothing he could do. I hung up and started feeling awful. I called back and was told that I could come back to the office if I wanted to pay. I went to the office the next day and they put me on a shot that I have to take every two weeks. Then I had to get an MRI which I refused. I was given the option to have the nurse give the shot and go the office. I let them do it, thankfully it did work. I have made sure not to over do it because I have a job to get back to and I can't afford to lose the job. After the MRI the doctors and nurses did not call me with the results. I called them and they said they would send them to me the next day. They never did. I called over a week after the MRI and they told me it was nothing that could be treated and I should move on with my life. I do not remember getting a call from the doctor's office with the results. They said I would get a call from the doctor, but I never did. They also told me there was nothing wrong with the knee. I have a right knee that is slightly arthritic and a left that is completely arthritic, I am on a cane and it is causing a lot of issues because of my job. I am constantly looking at my legs to make sure the swelling doesn't go up. But the doctors seem uninterested in finding out what is wrong. I do remember that the nurse that gave me the shot mentioned something about radiation. I was hearing a lot of horror stories about that in my house. I have read about it on the internet and they make me so scared. I just hope that I can keep working.

## Plant Firefighter Simulator 2014 Hack Working

I have a lot of information to cover and I am being pulled in all directions. There are a lot of people who want to know what happened but are not interested in doing anything about it. They are too afraid for their employees/employers/pockets. This is so wrong and totally unfair. This is why I started the ask a question tag to keep people focused on the big picture, and will use this blog to cover the time line. I am working on the section about my condition the docs behavior toward me, and the whole thing should be ready by this weeks end. I will see if I can get a video to show to a support group I am attending also this week. I want to give a voice to those who have been shutdown from discussing it, have been ignored or shunned by the sector, who have been intimidated and threatened. I am not telling things to make myself important, i just want people to know what happened and can be a warning to those who are afraid of responsibility because there will be a response from me and i am a scary person to some, this could cause a domino effect. Yes, I know I can be frightening, and i am not sure if that is on purpose, I have been labeled as such. I have dealt with my own fears and trauma and I am very aware of it, it has prevented me from becoming a CEO. Most people cannot detect this and it is often overlooked. I am working on it, but it takes time for alexa to read my posts, so it is a slow process. I can not speak for my ptsd as i am not diagnosed, but I know how it feels to be called a liar and a cheater. I tell the truth and I am an extremely truthful person, so when other people start shouting conspiracy and that people are trying to control my life, my family and my friends I know they are lying. If you are lying this is the easiest way to control people, keeping them suspicious. That is what happened to me, and it is ridiculous to think of me as a snake or a puppet. I just want the truth and more importantly to avoid doing this to people again. It is so devastating when you do not trust anyone, I just want people to know me and to not think I am this person. I really want to help people but I have a lot to cover. Right now I want to address the direct affect the conflicts will have on medical practitioners, and how that relates to the nuclear plants. First the situation with the Indian conflict a few days ago with a nuclear plant. India is a large country with a long history of war. They have been restricting press access to areas. This is a very bad situation. They always have a prepared strategy, and it is not constructive to assume that they will not do anything. It is bad business and dangerous to launch a war with a nuclear power. It is not a good way to use potentially a dozen nuclear power plants with a bad politics, and the threat of dirty bombs. Those reactors are filled with huge amounts of spent nuclear fuel. There is also plenty of highly radioactive water. Most of the water is in drums, but there is also a lot of spent fuel rods, they are also in piles. I do not know the exact dates and locations of the bombing, but US bombers flew over the site after attacks with thermobaric bombs or bunker busters. They dropped everything from 2 megatons to 18 megatons. 5ec8ef588b
