A tool that helps you organize your digital media and quickly find a file based on several conditions. The software is designed to playback video files like MOV, 3GP, 3GP2, AIFF, MP3, MP4, WAV, TIFF, JPEG, BMP, PCT, PNG, MPEG1, MIDI etc. You can edit the video with ease. You can change the frames per second, and the brightness, contrast, saturation and hue. There are a number of tools for editing. The video effects include Rotate, Brightness, Contrast, Saturation, Hue, Gamma, Zoom, Thumbnail View, Export to Video and Export to PDF. The size of the video is a key issue. Therefore, it is possible to preview the entire video, only some frames, part of the video and a

specific time. The video is also indexed to allow you to quickly find your files. It is also possible to add music to the video files or change the location of the audio in the video. The audio has its own settings, including the playback speed and level. It is possible to create a new playlist, find a video by its music, or add a new music track to a video. The software is designed to playback audio in the following formats: AIFF, MP3, MIDI, MP4, OGG, AAC, WAV, TIFF, WMA, FLAC, VOX, SBE, DTS, M4A, MPEG1, MPEG2 and MPEG4. The video format supported by the application includes MOV, MP4, 3GP, 3GP2, MP3, 3GPP, AIFF, WAV, M4A, SBE, OGG, MP4, DTS, VOX, APE, M4V, RM, SVCD, MPA, FLV, VOB, MPG, MOD, WTV, CDA, 3GP, 3GP2, AIF, FLV and MKV. Optimistic

Speech Recognition is a speech recognition plugin for English. It has a built-in memory of phrase list so you don't have to train your own. Optimistic will optimize your application's runtime by compiling a list of words from the application's memory into speech recognition dictionary. You can change the dictionary by changing Optimistic's Dict file. You can find the file in the package of the application. You can extract and translate words in the audio files. It includes Gram
